

Proposed Building And Property Drawing

The Pittsylvania County Structure Numbering and Street and Road Naming; Signage Ordinance requires that a drawing be submitted with each building permit application. Please use the space below to provide the following information:

1. Shape and size of parcel of land on which building would be located.
Draw lot boundaries, dimensions, right-of-way, etc.
2. Location of other structures or appurtenances existing on the parcel.
3. Location of proposed building with respect to property lines, other structures on the parcel, rights-of-way, etc.
4. Scale of drawing (example: 1" = 20')
5. Identify proposed use of structure or land in general terms.
6. Property identification number.

This drawing is true to the best of my knowledge. I realize, as owner/applicant, if the setback requirements of the Pittsylvania County Zoning Ordinance are not met the building permit will be null and void.
